

Push-on Bayonet Lock Miniature Waterproof Connectors

HR34B Series

Push-on Bayonet Lock

fig.1

■ Features

1. Water and dust protection

- IP67 or more (IP68) water and dust protection rating when fully mated.
- Resistant to industrial grade oils.
- 4-position receptacles are sealed against water penetration when mounted on the panel - no protective cap is required.

2. Easy and precise mating

- Mating: Just inserting plug unit completes mating
Unmating: Rotating sleeve counterclockwise unlocks connectors (fig.1)
- Marking helps align plug with receptacle when mating.
- 3 guide keys make blind mating possible.
(Receptacle structure prevents plug from damaging receptacle terminals)

3. Multi-directional cable exit

Right angle plugs allow the cable to exit in 8 directions, in 45° increments.(fig.2)

4. Safty standards

The 4-position connectors meet requirements of TÜV standard.

5. Wide variation

◆ Handling

1. Mating	2. Un-mating
<p>Holding the plug by the outer shell (A) align the arrow on the plug with the alignment mark on the receptacle and push straight in.</p>	<p>Rotate the sleeve (B) counter-clockwise to a full stop and un-mate the plug from the receptacle.</p>

◆ Precautions

When completely mated and locked the alignment arrow on the plug must line-up with the center line of the connector (alignment mark on the receptacle).

If the alignment arrow and the center line of the connectors are not aligned (1mm max.) re-insert the plug until they are aligned.

1. When disconnecting or inserting the connector, be sure to do so after turning off the power.
2. To insert the connector, push it in until the arrow tip of the plug mating mark indicates the specified position of the diagram below (i.e., the mating mark of the receptacle).
3. Note that the display method of the mating mark will differ depending on the receptacle.
4. To maintain the waterproof quality and cable clamp force, use a cable that is within the range of the applicable cable diameter.
5. Please consult Hirose Electric Sales for harness assembly procedure (ETAD-C0116-00).
6. Please note that the white label on the connector may come off due to solvents such as alcohol.
